## DETAILED ACTION

Claims 1-3 are pending in the application.

### *Priority*

Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 10/283,440, filed on October 30, 2002.

### *Information Disclosure Statement*

The Information Disclosure Statement filed on February 12, 2004 has been considered by the Examiner.

*Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over DeGasparo et al. {WO 97/31634} and Huel et al. {U.S. Pat. 5,594,003}, each taken alone or in combination with each other.

*Determination of the scope and content of the prior art (MPEP §2141.01)*

Applicants claim the hydrochloric acid, hydrobromic acid, toluenesulphonic acid and the methanesulphonic acid addition salts of Telmisartan. DeGasparo et al. (pages 5, 8 and 12) and Huel et al. (compound D in column 52, lines 47-49; Example 9 in column 60; column 51, lines 1-7; and column 56, lines 23-43) each teach the hydrochloric acid, hydrobromic acid, toluenesulphonic acid and the methanesulphonic acid addition salts of Telmisartan.

*Ascertainment of the difference between the prior art and the claims (MPEP §2141.02)*

The difference between the instant claimed compounds and the compounds in the prior art is that the prior art generically describes the various salts of Telmisartan.

*Finding of prima facie obviousness--rational and motivation (MPEP §2142-2413)*

The indiscriminate selection of “some” among “many” is *prima facie* obvious, *In re Lemin*, 141 USPQ 814 (1964). The motivation to make the claimed compounds derives from the expectation that structurally similar compounds would possess similar activity (e.g., angiotensin antagonists).

One skilled in the art would thus be motivated to prepare products embraced by the prior art to arrive at the instant claimed products with the expectation of obtaining additional beneficial products which would be useful in treating, for example, arteriosclerosis. Since each of DeGasparo et al. and Haul et al. teach the salts of Telmisartan and that Telmisartan is useful in treating, for example, arteriosclerosis, the combination of the prior art would also teach the instant claimed

invention. The instant claimed invention would have been suggested and therefore, obvious to one skilled in the art. A strong case of *prima facie* obviousness has been established.
